
Holomorphic Curves Symplectic Geometry Progress

lectures on holomorphic curves in symplectic and contact ... - closed holomorphic curves from a modern perspective. (2) to use the above foundation to explain a few of the classic applications to symplectic topology, such as gromov's nonsqueezing theorem [gro85] and mcduff's results on rational and ruled symplectic 4-manifolds [mcd90]. **symplectic geometry on moduli spaces of j-holomorphic curves** - symplectic geometry on moduli spaces of j-holomorphic curves j. coffey, l. kessler, and a. pelayo ´ abstract let $(m; !)$ be a symplectic manifold, and a compact riemann surface. we define a 2-form $! s(i)$ on the space $s(i)$ of immersed symplectic surfaces in m , and show that the form is closed and non-degenerate, up to reparametrizations. **j-holomorphic curves and quantum cohomology** - the theory of j-holomorphic curves is one of the new techniques which have recently revolutionized the study of symplectic geometry, making it possible to study the global structure of symplectic manifolds. **rational curves on holomorphic symplectic fourfolds ...** - rational curves on holomorphic symplectic fourfolds by brendan hassett and yuri tschinkel 1. introduction one of the main problems in the theory of irreducible holomorphic sym-plectic manifolds is the description of the ample cone in the picard group. the goal of this paper is to formulate explicit hodge-theoretic criteria for **lectures on holomorphic curves in symplectic and contact ...** - 1.5. from symplectic geometry to symplectic topology 10 1.6. contact geometry and the weinstein conjecture 13 1.7. symplectic fillings of contact manifolds 19 chapter 2. fundamentals 25 2.1. almost complex manifolds and j-holomorphic curves 25 2.2. compatible and tame almost complex structures 29 2.3. linear cauchy-riemann type operators 41 2.4. **j-holomorphic curves and symplectic topology - gbv** - 9.4. symplectic 4-manifolds 307 9.5. the group of symplectomorphisms 320 9.6. hofer geometry 328 9.7. distinguishing symplectic structures 334 chapter 10. gluing 343 10.1. the gluing theorem 344 10.2. connected sums of j-holomorphic curves 347 10.3. weighted norms 349 10.4. cutoff functions 353 10.5. construction of the gluing map 356 10.6.
